2

3

4

## Addition challenge!

Use a written method to solve these additions. Show your working.

5  $28.21 + 16.47 + 3.09 =$

	2	8	·	2	1
	1	6	·	4	7
+		3	·	0	9

6  $9.7 + 18.36 + 44.88 =$

## Addition challenge!

7  $7.94 + 80.69 + 53.45 =$

8  $16.15 + 31.82 + 27.72 =$

## Adding and checking

- 9 The top three games in a shop cost £35.89, £28.45 and £19.20. How much is it for all three games?

- 10 Use the inverse to check the answer to this addition.

$$6844.3 + 798.71 = 7743.01$$

- 11 Write and solve your own addition. Check it using the inverse.

Explain how you could add an extra tenth.
